MICROSOFT 365 SMARTCHECK REPORT

SAMPLE EXECUTIVE SUMMARY REPORT POWERED BY BABBLE

Why SmartCheck?

SmartCheck is Babble's Microsoft 365 audit tool built to reveal inefficiencies, security vulnerabilities, and cost-saving opportunities. With a single scan, it provides actionable intelligence to optimise your Microsoft 365 environment.

What This Report Shows

This sample showcases the business-critical insights SmartCheck uncovers during a full audit of your tenancy. From underused licences and storage bloat to security gaps and app engagement, SmartCheck pinpoints where your Microsoft 365 setup can be tightened and improved.

MICROSOFT 365 SMARTCHECK REPORT

SAMPLE EXECUTIVE SUMMARY REPORT POWERED BY BABBLE

Audit Area	What You Get
Licence Management	Spot inactive licences, recover value, and right-size plans
Security Posture	Improve your Microsoft Secure Score and reduce exposure
Data & Storage	Flag redundant files, cleanse large storage volumes
SharePoint Activity	Identify inactive sites and archive or remove outdated content
Product Adoption	Understand which apps are being used and where engagement is low
Alert Surface	Review security alerts and misconfigurations that may leave you exposed

Recommendations at a Glance:

- Recycle unused licences and perform an annual licence audit
- Close Secure Score gaps by addressing identity and threat protection
- Cleanse redundant data and adopt immutable storage policies
- Archive inactive SharePoint sites to reclaim space
- Investigate live alerts and improve detection mechanisms
